

## Intranet Consulting

Reaping the benefits of audiovisual internal communications within an organisation requires a network capable of delivering the content and employee workstations capable of receiving it. Virtue can optimise your network, and ensure your audiovisual communications needs are met.

### About Intranet Consulting Services

Our consulting services include the review and assessment of hardware and software requirements for streaming media within the company intranet and the delivery of a proven intranet solution.

We ensure three critical areas are up to standard:

**Connectivity** – ensures your network is capable of handling high-volume delivery of audiovisual content, with no loss of quality for other applications

**Security** – ensures you experience no security issues, from firewall concerns to secure content delivery

**Viewer Access** – ensures your employees have the right hardware, software and configuration to view audiovisual content

### Deliverables

- Delivered in five working days
- Network diagnostic
- Hardware sourcing, set-up & installation
- Hardware & software configuration

### Additional Services

**Network Diagnostic** – a two day review and assessment of your internal network, with report delivered at the end of the project.

**Site Statistics** – incorporate a higher level of data analysis into your reporting by gathering region (site) specific statistics to increase your cost-benefit analysis

### Some Successful Client Implementations

### Benefits

- Effortlessly integrate audiovisual communications
- Fully managed service
- Smooth integration with IT infrastructure
- No negative impact on network quality

**“Planning our merger with Degussa-Hüls, we find ourselves with two corporate cultures and over 60,000 employees in 100 countries worldwide. To make the merger as expedient and successful as possible, we looked to Virtue to provide us with an internal communication solution to facilitate essential interfaces to future business units, divisions and service units. Virtue’s Intranet broadcasting solution allows us to communicate mission-critical content to all management and employees in a timely manner - a key factor in establishing solidarity, consistency and trust throughout the new, future entity“**
