

Virtual Classroom included in TRAINSTORM solutions

Foroso Communications cooperates with TRAINSTORM

Munich, February 2, 2004 – TRAINSTORM is a new solution partner of Foroso Communications. As of now, Foroso Training Center is offered to TRAINSTORM customers as a component of their complete solutions.

TRAINSTORM is a solution provider in the training market, who implements project and customer specific Blended Learning Solutions for various solution areas.

Blended Learning Solutions means a comprehensive combination of presence training and eTraining plus eMethodology in order to achieve the objectives of training projects.

As of now, TRAINSTORM will offer the Foroso Training Center as Virtual Classroom solution. Without any need for software installation, training participants can work together in real-time with trainer and other participants. A variety of features support live communication and interaction.

„In our solution mix, presence training and eTraining are supporting each other. A Virtual Classroom is an important component in that concept“, states Werner Hahn, CEO of TRAINSTORM. „Foroso provides our customers with a powerful tool which excels through its unique accessibility and usability.“

„TRAINSTORM is a competent partner for us in the learning market“, says Franz Buchenberger, President and CEO of Foroso Communications. „TRAINSTORM's extensive experience in this market is a good fit with our innovative product.“
